ER-280

Solution for the Retail and Hospitality Environment, with Effective Financial Reporting and Durable Construction

ER-280 is a powerful solution for most retail & hospitality applications. The elegant appearance and high performance of thus model will satisfy the high demands of customers.
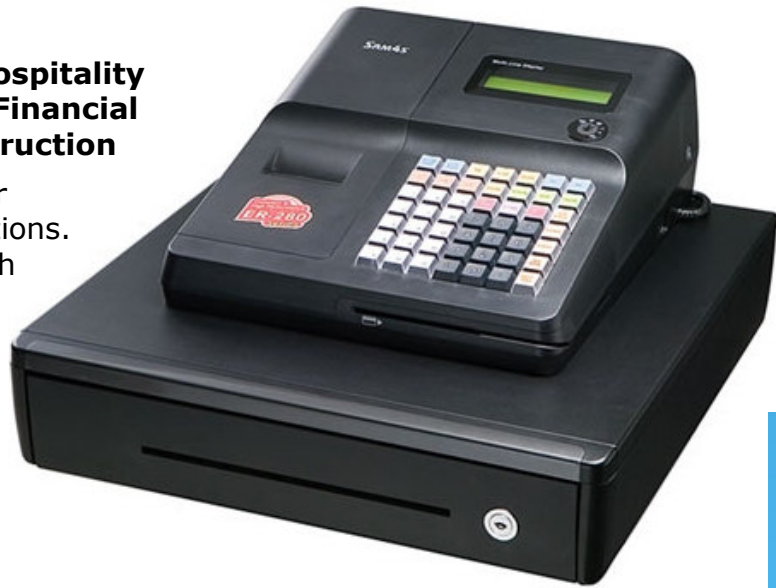

- **2000PLUs**

2000PLUs (Memory allocation) can be extended Max. 10,000 with additional 4M SRAM

- **Real time Clock-hourly sales reporting**

Printing the time, charging the data, and generating hourly sales reports are all possible. Hourly report data details the net sales and customer count for each hour of the day

- **30 Departments**

30 departments (SHIFT KEY) increase the ease of operation and point of purchase control in retail & hospitality applications. Fast moving items can be easily checked for price and count

- **Financial Reports**

A complete analysis of your department sales, function totals and actual totals gives you a thorough review of your business. This financial analysis feature will bring total control over your budget, stock status, etc.
