

# Time Attendance / Access Control

## Staff on Time – Plus Bio I

Staff on time® Plus Bio-I is an attendance control solution based on the biometrical fingerprint technology, for small and medium companies. It uses a biometric scanner which overcomes the current fingerprint technologies, with the LE technology (Light Emission).

The LE sensor reacts when in contact with the fingerprint. The fingerprint's wrinkles generate light, creating the exact image of the fingerprint, even if it's dirty thus avoiding false rejects.

It's not possible to mislead the sensor using a graphic image of the fingerprint (because the fingerprint's curbs, which activate the sensor, are missing), or using inorganic materials (because these materials lack of conductivity which generates the luminescence needed).

Staff on time Plus BIO-I is able to compare up to 4,200 different

fingerprints. It allows registering two fingerprints per employee with a maximum of 2,100 employees and realises 25 punches per minute.

The Terminal, made with strong materials and with a nice design, can be placed on a table\* or on the wall. Its ergonomic design facilitates the capture of the fingerprints.

It incorporates 4 LEDs (On, Ok, Err and Ready) which facilitates the communication between the Terminal and the user and dispense with using the computer's screen during the signing up process. They provide information about the process using also audio signals, all different according to the event. In Addition, it includes a relay which allows controlling the doors' opening, lighting panels, alarms...

The solution Staff on Time Plus Bio-I includes the complete Staff on time ® version. This software includes three modules: Staff on time® admin. (Management and administration module, Staff on time ® ID (module of biometric recognition) and Staff on time ® Info (listing of the users' attendance).

---

## Advantages

---

- Up to 2,100 users and 25 punches per minute
- Configurable for multiple companies and departments
- Permits two fingerprints for each employee
- Configurable for multiple schedules
- Printing of monthly work calendars
- Possibility to register entries and exits of employees with flexible schedules (without defined schedules)
- Days off assignable collective or individually
- Lists of information with: Comments on specific exits, punctuality on every entry/exit, worked hours per day, average punctuality (total or by shifts), average and total worked hours (total or by shifts)
- Editing's and lists of incidences, of entries and exits (shifts not completed, absence)
- Extraction to CSV format (compatible with Excel, Access etc) of all data, which allows you to export them to other systems, or individual control of each company
- Assignment of individual accesses to restricted areas of the company for each employee/administrator
- Can have different points of entries/exits
- Available in multiple languages: German, Catalan, Spanish, French, Dutch, English, Italian and Portuguese
- Terminal with a strong and resistant design can be placed on a wall or a table (thanks to the pedestal)
- Ergonomic design which facilitates the capture of the fingerprints
- The terminal includes 4 LEDs and audio signals

### What's In The Box?

- Software and Manual (CD-ROM)
- Biometric Terminal
- Quick Guide
- Screws set to set it up on a wall (\*optional)
- Desk support for the terminal

### System Requirements

---

P IV of 1.5 GHz

---

512 MB RAM

---

CD-ROM Player

---

USB Port 2.0

---

100 MB Free Hard Disc Space

---

16 bits 800 x 600 screen

---

Windows XP or 2000

---

---
