

# Time Attendance / Access Control

## Staff on Time - Pro Bio I

*Biometric attendance system  
the safest modern way to control  
the company's productivity*

Staff on time® Pro BIO-I is an attendance control solution based on the biometrical technology, for small and medium companies.

It uses a biometric scanner, which overcomes the current fingerprint technologies, with a LE technology (Light Emission).

The LE sensor reacts when in contact with the fingerprint. The fingerprint's wrinkles generate light, creating the exact image of the fingerprint, even if it's dirty thus avoiding false rejects. It's not possible to mislead the sensor using a graphic image of the fingerprint (because the fingerprint's curbs, which activate the sensor, are missing), or using inorganic materials (because these materials lack of conductivity which generates the luminescence needed).

Staff on time PRO BIO-I is able to compare up to 4.200 different fingerprints. It allows registering two

fingerprints per employee with a maximum of 2.100 employees and realizes 30 punches per minute.

The Terminal, made with strong materials and with a nice design, can be placed on a table or on the wall. Its ergonomic design facilitates the capture of the fingerprints.

It includes a 10 digits keyboard (+ function key + cancel key), which allows you to assign, in option, an individual code to each user, so the fingerprint search is immediate, and reduced to zero the possibility of an error of wrong identification. The 10 digits keyboard and the LCD allow the use of special codes for entries and exits, which will count, or not as work time (business visits, breaks to smoke).

The LCD, in addition to the audio signals, will inform the user of the result when signing up. The solution Staff on Time Pro BIO-I includes the

complete Staff on time ® version. This software includes three modules: Staff on time® admin. (Management and administration module, Staff on time ® ID (module of biometric recognition) and Staff on time ® Info (listing of the users' attendance).

---

## Advantages

---

- Up to 2,100 users and 30 punches per minute
- Configurable for multiple companies and departments
- Permits two fingerprints for each employee
- Configurable for multiple schedules
- Printing of monthly work calendars
- Possibility to register entries and exits of employees with flexible schedules (without defined schedules)
- Days off assignable collective or individually
- Lists of information with: Comments on specific exits, punctuality on every entry/exit, worked hours per day, average punctuality (total or by shifts), average and total worked hours (total or by shifts)
- Editing's and lists of incidences, of entries and exits (shifts not completed, absence)
- Extraction to CSV format (compatible with Excel, Access etc) of all data, which allows you to export them to other systems, or individual control of each company
- Assignment of individual accesses to restricted areas of the company for each employee / administrator
- Can have different points of entries / exits
- Available in multiple languages: German, Catalan, Spanish, French, Dutch, English, Italian and Portuguese
- Terminal with a strong and resistant design can be placed on a wall or a table (thanks to the pedestal)
- Ergonomic design which facilitates the capture of the fingerprints

### What's In The Box?

- Software and Manual (CD-ROM)
- Biometric Terminal
- Quick Guide
- Screws set to set it up on a wall
- Desk support for the terminal (\*optional)

### System Requirements

---

P IV of 1.5 GHz

---

512 MB RAM

---

CD-ROM player

---

USB Port 2.0

---

100 MB Free Hard Disc Space

---

16 bits 800 x 600 screen

---

Windows XP or 2000

---

---
